

## Microsoft Surgery

### Target Audience

A Microsoft Surgery consists of a full consultancy day for users with specific problems or issues relating to Microsoft programs.

The day can be split into half hour or full hour sessions, and attendees book an appointment at the 'surgery' to obtain advice or information relating to their specific issues.

### Objectives

- The day will enable users to bring along their own specific files, ask questions and obtain help and support.

### Price

- The set price for the day is £550.
